Title	Unit
Implement Cash in Transit Security Procedures	Specified Elective Unit

What this unit covers.

To confirm your learning, you must achieve competence of the learning outcome. You, as the Student must demonstrate that you can perform each of the given performance criteria of the learning outcome. Your own self-assessment and that of your immediate workplace supervisor confirming your competence indicate this.

Performance Criteria 1	Check and monitor personnel and goods within the work area.
Performance Criteria 2	Coordinate responses on security incidents/emergencies.
Performance Criteria 3	Carry out surveillance of work areas.
Performance Criteria 4	Complete reports.

Elements

1 Personnel and vehicles are checked in accordance with workplace operational procedures and statutory authority regulations. Reival and delivery of consignment are recorded in accordance with workplace operational procedures to ensure identification of carrier, vehicle, consignment, receiver and documentation. Consignment content is checked to ensure that container seals are correctly applied and audit trail preserved prior to commencing operations. Discrepancies in consignments are reported in line with workplace procedures.

2 Security incidents/emergencies are dealt with in accordance with statutory authority regulations and workplace operational procedures. When reports of incidents/emergencies are communicated, the intended message is transmitted in a concise style that conforms to workplace policy. Potential security risks are observed and reported in accordance with operational procedures.

3 Surveillance of work areas is carried out in accordance with workplace operational procedures and statutory authority regulations to ensure security requirements are fulfilled. Equipment is checked and operated in accordance with workplace procedures and, where applicable, statutory regulations.

4 Reports of operations are completed within workplace procedures and timelines. Incidents or occurrences are reported to authorities and workplace personnel in writing and verbally as appropriate.

Duties performed by the Student meet the required performance criteria

Title	Unit
Undertake Cash in Transit Loading & Unloading in an Unsecured Environment	Specified Elective Unit

What this unit covers.

To confirm your learning, you must achieve competence of the learning outcome. You, as the Student must demonstrate that you can perform each of the given performance criteria of the learning outcome. Your own self-assessment and that of your immediate workplace supervisor confirming your competence indicate this.

Performance Criteria 1	Select loading site.
Performance Criteria 2	Undertake load transfer.
Performance Criteria 3	Complete transfer documentation

Elements

1 Plans of site access, exit points and key physical features are identified. Site for consignment transfer is selected in accordance with security plan and with due regards for own safety, safety of security team, members of the public and consignment. Loading site(s) is selected in consultation with customer and/or specific loading/unloading requirements are identified and assessed for accessibility and security. Alternative loading sites are identified in accordance with workplace operating procedures where pre-determined site is assessed as inappropriate. Proposed changes to loading site(s) are relayed to branch and authorisation sought where required.

2 Permission to enter and exit loading area (where required) is obtained in accordance with workplace procedures. Security procedures, including positioning of personnel, travelling across public areas, and carrying/loading techniques are undertaken in accordance with operational plan. Security systems are activated/deactivated as necessary in accordance with workplace procedures. Contingency plans are identified and confirmed with other team members. Security devices are activated at consignment in accordance with procedures. The environment is constantly monitored to maintain a safe working environment. Consignment is identified and details are verified and checked for conformity with manifest. Non-conforming consignments are documented and reported in accordance with workplace procedures. Load characteristics are identified and considered when determining appropriate loading and unloading procedures. Load handling demonstrates compliance with (any) loading regulations and workplace safety requirements. Consignment is delivered, stored and secured in accordance with operational plan and workplace procedures.

3 Details of consignment delivery are verified by client or client representative. Transfer documentation is completed in accordance with workplace procedures.

Duties performed by the Student meet the required performance criteria

Title	Unit
Test & Inspect Cash in Transit Security Equipment	Core Unit

What this unit covers.

To confirm your learning, you must achieve competence of the learning outcome. You, as the Student must demonstrate that you can perform each of the given performance criteria of the learning outcome. Your own self-assessment and that of your immediate workplace supervisor confirming your competence indicate this.

Performance Criteria 1	Inspect equipment and work area.
Performance Criteria 2	Check equipment operational capability
Performance Criteria 3	Identify and assess the impact of faults on security requirements
Performance Criteria 4	Record and report results of inspection and testing

Elements

- The equipment is checked prior to use in accordance with the manufacturer's safety checks, specifications and workplace procedures to ensure it is free from damage or faults that may limit operational capability. Work area is checked to ensure that it is safe and appropriate for the required task.
- Equipment and components are inspected in accordance with the manufacturer's specifications and workplace procedures and occupational health and safety requirements to ensure effective operation. Warning systems are checked for operational effectiveness. Inspection is conducted in accordance with maintenance schedule and degree of use.
- Equipment faults are identified and assessments made of the potential effect on the operation of the equipment for the required work. Non-serviceable equipment is tagged, reported to appropriate personnel and/or processed for repair or disposal. Replacement(s) for non-serviceable equipment are obtained in accordance with workplace procedures.
- Accurate reporting of the results of the inspection and testing is kept in accordance with statutory requirements, workplace policy and industry guidelines. Records are kept in accordance with workplace policy. Clear reference is made to any items which may affect the future safety of the equipment.
